

ForkliftsA

A forklift truck (also called a lift truck, a fork truck, or a forklift) is a powered industrial truck used to lift and transport materials. The modern forklift was developed in the 1960s by various companies including the transmission manufacturing company Clark and the hoist company Yale & Towne Manufacturing. The forklift has since become an indispensable piece of equipment in manufacturing and warehousing operations. Types of forklifts available are as follows:

- Container Master Forklift
- Industrial Forklift
- Rough Terrain Forklift
- Heavy Duty Forklift
